Abstract (Basic): DE 29915185 U1

NOVELTY - The device (1) has a hand grip (11) with integral operating section (12) at one end. Two cross section connection grooves (11) take up ribs (22) in a housing (2) which covers hand grip. Housing also contains massage protrusions.

DETAILED DESCRIPTION - The device has an integral hand grip (11) and operating section (12) with a protruding massage section (112) on lower side. Operating section has a number of function keys (122) and cursor positioning device e.g. trackball or joystick (121). Further protruding massage area (23) is provided on lower side of housing. Ribs (22) are provided to firmly hold hand grip in take up chamber (21) of housing by fitting into grip grooves (111) of positioning device. Housings of different sizes fit onto the hand grip allowing adjustment to fit different users. Also provided on the housing is a body scratch pad.

USE - To control position of cursor on computer screen, also functions as massage device.

ADVANTAGE - Housing will fit different users.

DESCRIPTION OF DRAWING(S) - The drawing shows the handheld device and housing.
